
UND SMHS Strategic Plan Individual Unit Report for 2022

GOAL 3 for **Chose or type your unit name here**

LEARNING

One UND Strategic Plan Goal 3: *Deliver more educational opportunity online and on-campus.*

UND SMHS Strategic Plan Goal 3: *The SMHS will identify opportunities to employ state-of-the-art technologies to enhance education.*

1. Describe if/how your unit has addressed this goal.

COVID has required us to deliver most of our preclinical education online but we are now transitioning back to in person activities as required by university policy. We are experimenting with moving more lecture material to asynchronous education, freeing up student time for self-directed learning while maintaining faculty-student contact with debriefing Q&A and problem-solving exercise periods. We are also continuing to work to expand residency and fellowship program offerings. Our first oncology fellowship program fellows matriculated in July of 2021. We are anticipating submission of applications for a pediatrics residency and a forensic pathology residency in the coming academic year.

2. Describe how your efforts are being assessed.

We can count the number of residents and fellows (and note that it is increasing).
Efforts at delivering curriculum online or asynchronously are assessed for success based on student performance and student satisfaction.

3. Describe how your unit analyzed these data and what assessments were determined.

Student performance continues to be overall good, despite COVID, and in particular curriculum 2.0 students seem to be doing better. Residency and fellowship numbers are increasing. However, student satisfaction with moving more lecture material online and asynchronous has been mixed, and we are currently working with the students to try to ameliorate dissatisfaction.

4. Describe how your unit will implement any further changes and what barriers may exist.

The barriers to residency expansion are primarily lack of appropriate clinical material and willing hospital partners, as well as funding issues. Students do not want to have a medical program that delivers most of their education online.

PROVIDE A RATING OF YOUR PROGRESS ON THIS GOAL: ● On Track; ● Delayed; ● Behind
