

A Collaborative Occupational Measure of Performance and Change over Time
(The COMPACT™)

Authors: Jan Stube, PhD, OTR/L, FAOTA, and Debra Hanson, PhD, OTR/L, FAOTA

The COMPACT™ is an assessment tool for occupational therapy practitioners, designed to bring client-centeredness and occupation-based practice into the forefront of contemporary occupational therapy collaborative service delivery in physical disabilities settings. OT practitioners are encouraged to select clients/caregivers who are most likely to benefit from use of this collaborative tool.

The COMPACT™ is a public domain instrument that is available for free download here. All we ask is that you email Dr. Jan Stube at jan.stube@med.und.edu to tell us the context in which you work and would choose to use this assessment tool.
