Comparative Outcomes of Hospital Surgical Care in the United States

Objectives:

1. Understand the role of risk-adjustment in outcomes of surgical care
2. Illustrate the large variation in surgical outcomes and the opportunity for improvement
3. Correlate inpatient complications with post-discharge readmissions
4. Identify the common and relevant causes of post-discharge readmissions

The Edwin C. James Lectureship was established in honor of Edwin C. James, MD, FACS (1932–1994); Professor and Chairman, UND Department of Surgery 1980–89; Dean, UND School of Medicine 1988–93; and Founder of the UND Surgical Residency Program.

invites you to join us for the

Edwin C. James Lectureship and Surgical Resident Research Colloquium

- ◆ The annual Surgery Resident Research Colloquium is held for presentation of each general surgery resident's research project for the academic year.
- ◆ All residents are required to participate in a research project under the guidance of a faculty mentor.
- ◆ First and second year residents present posters of their projects in development. Third, fourth & fifth year residents give oral presentations of their projects.
- ◆ Presentations are judged by a panel of clinical & basic science faculty with the best projects in each category honored at the Chief Resident Graduation Banquet.
