HISTORY

The University of North Dakota School of Medicine & Health Sciences, founded in 1905, was a two-year school of basic medical science until 1973, when the North Dakota Legislature approved initiation of a four-year curriculum leading to the Doctor of Medicine (M.D.) degree. The School's first four-year M.D. graduates crossed the Commencement stage in 1976. The School offers a statewide, university-based, community-integrated medical education program that places an emphasis on primary care. Practicing physicians, constituting the majority of the faculty, educate medical students in clinics and hospitals throughout the state.

The primary purpose of the University of North Dakota School of Medicine & Health Sciences is to educate physicians, medical scientists, and other health professionals, and to enhance the quality of life in North Dakota. Through its federally funded Indians Into Medicine (INMED) Program, the School also seeks to address disparities in access to health care by educating American Indians as physicians and other health professionals.

The first two years of medical education are provided at the UND campus in Grand Forks. The third and fourth years consist of clinical rotations in Bismarck, Fargo, Grand Forks, and Minot. Students may elect to take the majority of their third year in rural communities through a program called ROME, Rural Opportunities in Medical Education, or the Minot Integrated Longitudinal Experience (MILE), a course of clinical training that third-year students undertake in required clerkships taught over the entire third year, in a longitudinal, integrated fashion. Medical students also have the opportunity to experience training in other parts of the country and the world through fourth-year electives. Postgraduate residency training in family medicine, geriatrics, hematology-oncology, internal medicine, general surgery, orthopedic surgery, neurology, pediatrics, and psychiatry, as well as a one-year transitional program, is conducted in the state's four major cities.

In addition to the medical education program, the School offers graduate study in athletic training, biomedical sciences, clinical and translational science, Indigenous health, medical laboratory science, occupational therapy, physical therapy, physician assistant studies, and public health. Undergraduate study is offered in medical laboratory science.

THE CONTEMPORARY OATH OF HIPPOCRATES

Today, in the presence of family, friends, teachers and colleagues,
I dedicate myself to the profession of medicine.

I pledge myself to the service of humanity.

I will use my skills to care for all in need, without bias and with openness of spirit.

The health of my patients will be my first concern.

I vow to hold sacred the bond between doctor and patient.

I will hold in confidence all that my patients entrust to me.

I will strive to alleviate suffering.

I will respect the dignity and autonomy of my patients in living and in dying.

As a physician, I recognize my duty to society.

I will work to promote health and prevent disease.

I will advocate for the welfare of my community.

Even under duress, I will not use my knowledge or my skills against humanity.

I will acknowledge my limitations and my mistakes so that I may learn from them.

To uphold these responsibilities, I will maintain my own well-being and the well-being of those
close to me.

I will promote the integrity of the practice of medicine.

In the tradition of my profession, I honor all who teach me this art.

Through honest and respectful collaboration with my colleagues, I will uphold the highest standards
in the service of patients.

I will seek new knowledge, reexamine ideas and practices of the past, and teach what I have learned

Above all, the health of my patients will be my first concern.

This oath I take freely and upon my honor.

This contemporary version of the traditional Oath of Hippocrates was composed by the Harvard Medical
School Class of 1998.

KEYNOTE SPEAKER

FROM STUDENT TO DOCTOR: MORE THAN JUST A PIECE OF PAPER

Lauren Nichole (“Nikki”) Huddle, M.D., the daughter of a nurse and a factory worker, was born and raised in a rural small town nestled in the Appalachian Blue Ridge Mountains of southwest Virginia. Following her graduation from both George Wythe High School (Wytheville, Va.) and the Southwest Virginia Governor’s School (Pulaski, Va.), Dr. Huddle continued her education at the University of South Carolina, where she was elected to multiple honor societies (including Phi Beta Kappa), served as the captain of the marching band color guard, and graduated magna cum laude with a Bachelor of Science degree.

She earned her Doctor of Medicine degree from the Virginia Commonwealth University School of Medicine (Medical College of Virginia or MCV) in Richmond, where she was honored with the M1 Award in gross and developmental anatomy and elected to both the Association of Pathology Chairs Honor Society and the Alpha Omega Alpha (AOA) Honor Medical Society. Dr. Huddle completed a residency in combined anatomic and clinical pathology at MCV, where she served as junior laboratory director for the autopsy service and was recognized for scoring in the top 99th percentile of the national annual pathology Resident In-Service Examination during her final year.

She remained in Richmond for her fellowship training in forensic pathology at the Virginia Office of the Chief Medical Examiner (OCME) and is board-certified in anatomic, clinical, and forensic pathology. Following her fellowship, Dr. Huddle remained at the Virginia OCME as an Assistant Chief Medical Examiner for four years, during which time she supervised and trained morgue personnel and local medical examiners, in addition to serving as office coordinator for inspection and accreditation through the National Association of Medical Examiners.

After leaving the Virginia OCME, Dr. Huddle spent three years in Pennsylvania working at a private forensic pathology office which provided autopsy and consultation services for local coroners, as well as for family members and legal representatives from across the country. In 2021, Dr. Huddle was thrilled to join the University of North Dakota School of Medicine & Health Sciences (UND SMHS) as a clinical assistant professor in the Department of Pathology. Though Dr. Huddle had been previously involved in teaching on a sporadic basis, this new opportunity at UND offered “the best of both worlds,” as she was able to be heavily involved in the pre-clinical medical school curriculum in addition to continuing to serve the medicolegal community as a forensic pathologist.

Since joining the UND SMHS community four years ago, Dr. Huddle has received three Outstanding Unit Instructor Awards (Classes of 2025, 2026, and 2027), the Portrait Award for Outstanding Support of Medical Students (Class of 2026), and both the Outstanding Faculty Member Award and the Golden Apple Award for Teaching Excellence (Class of 2025).
