Dermatology Goals and Objectives

Medical Knowledge

The resident should be able to:

- 1. Gain knowledge in physical exam, differential diagnosis, and to properly describe dermatologic lesions.
- 2. Discuss the evaluation, diagnosis, and management for the following dermatologic conditions:
 - a. Papulosquamous Disease: psoriasis, seborrheic, pityriasis rosea, lichen planus
 - b. Vesicobullous Disease: impetigo, herpes, varicella, phemighous, dyshidrosis, erythema multiforme, epidermolysis bullosa
 - c. Dermatitis: contact, atopic, nummular stasis
 - d. Macular eruptions: viral exanthems, drug eruptions
 - e. Urticarial eruptions and dermagraphism
 - f. Nodules: erythema nodosum, dermatofibroma, granuloma annulare
 - g. Pruritic conditions: scabies, dry skin, lichen simplex chronicus, pediculosis, insect bites
 - h. Cutaneous infections:
 - i. Bacterial: impetigo, cellulitis, erysipelas, boil
 - j. Fungal: superficial and deep
 - k. Viral: Zoster, simplex, warts, molluscum
 - 1. Rickettsia: lyme, RMSF
 - m. Complexion: acne vulgaris, rosacea, keloid, hyperhidrosis
 - n. Pigment disorders: hyper, hypo, vitiligo
 - o. Malignant: Basal cell, squamous cell, melanoma
 - p. Hair problems: alopecia, fungal
 - q. Nail problems: paronychia, fungal, ingrown toenail

Patient Care

The resident should be able to:

- 1. Give oral and written presentations to attendings in an organized, concise, accurate manner that include differential diagnoses and management plans.
- 2. Demonstrate principles of patient autonomy, confidentiality, and informed consent.
- 3. Develop and demonstrate ability to work in an organized, efficient manner in assessing and triaging patients according to urgency.
- 4. Use laboratory tests appropriately in delivering patient care.
 - 5. Demonstrate competency in the following skills:
 - a. Biopsy
 - b. Cryotherapy
 - c. Scrapes
 - d. Microscopic examination
 - e. Lesion excision
 - f. Proper use/potency of topical steroids

Interpersonal Communication Skills

The resident should be able to:

- 1. Effectively communicate with attendings and other healthcare members as a team in coordinating comprehensive healthcare.
- 2. Effectively communicate medical decisions and recommendations to colleagues and patients.
- 3. Discuss and demonstrate strategies to discuss sensitive subjects with patients.
- 4. Demonstrate effective, compassionate and empathetic communication with patients and families while considering psychosocial, economic, and cultural issues of care.

Systems-based Practice

The resident should be able to:

- 1. Demonstrate effective, compassionate and empathetic communication with patients and families while considering psychosocial, economic, and cultural issues of care.
- 2. Utilize ancillary services to provide cost-effective and economically appropriate medical treatments.

Practice-based Learning and Improvement

The resident should be able to:

- 1. Appraise and assimilate scientific evidence to guide improvement in patient care.
- 2. Incorporate formative evaluation feedback into daily practice.
- 3. Use information technology to optimize learning.

Professionalism

The resident should be able to:

- 1. Present themselves professionally in regards to dress, punctuality, and interactions with patients, families, and all medical care providers.
- 2. Demonstrate compassion, integrity, and respect for others.
- 3. Demonstrate respect for patient privacy and autonomy.
- 4. Apply the principles of medical ethics to decision making.
