# CoRE – Quarterly Meeting Notes

March 24, 2021; 12:00 p.m. to 1:00 p.m.

Zoom - https://und.zoom.us/j/8327382880

Attendees: Adrienne Salentiny, Erika Johnson, Richard Van Eck, Alicia Champagne, Darlene Hanson, Nasser Hammami, Sandi Bates, Sara Hulteng, Siobhan Wescott

Meeting called to order at 12:02 PM

| AGENDA ITEM | SUMMARY | ACTION/FOLLOW-UP |
|---|---|---|
| 12/14/2020 Meeting Minutes | • Additions or corrections?<br>• Approval | M- Rick Van Eck<br>S- Alicia Champagne<br>Carried<br>Abstaining: Darlene Hanson |
| Committee Charge | The Committee on Resources in Education (CoRE) shall:<br>• Identify needs and recommend solutions regarding educational resources that affect the academic and research programs of the School and its stakeholders.<br>• Engage in long range planning to meet current and future needs and make recommendations to FC. | Informational |
| CoRE Initiatives for 2021-2022 | Create a list of initiatives for the committee to focus on for 2012-2022 | ▪ Gain an understanding / create an inventory of resources and software purchased by departments (IR and Dean's office have already begun this work?)<br>▪ Centralize requesting and financing of resources so that they may be utilized by SMHS / CNPD (if appropriate)<br> o Laura Block has a focus on this process; she would be a resource and may have done work on this already. ACTION - Erika will speak with Laura about this.<br> o How can this be structured to be sure that CNPD is included as appropriate?<br>▪ Determine what resources students are using – including Nursing students. Would be great to promote these more to Nursing so that there is more use. |

| | | |
|---|---|---|
| | | ▪ How about OERs (Open Educational Resources). Can we facilitate how programs would find these OERs and be able to vet them? A good way to reduce costs for students in Nursing and other disciplines.<br>　o Montanna (new librarian) may be able to help facilitate this. ACTION - Darlene can reach out to Montanna.<br>▪ What are the resources we should have going forward (post pandemic; both for preparation for future events and to carry over and support the good things we have discovered).<br>▪ ACTION – Erika and Adrienne will work on a survey draft for next meeting. Include elements from this discussion. |
| Video creation software / hosting platform | What options are currently available at UND/SMHS?<br>• MediaSite - Is there a policy for removing content?<br>• Yuja | LR – create video modules for the library to instruct folks how to use various resources.<br>• Want to be able to assess in it and attach it to an LMS<br>• Where is it hosted?<br>• How can it be easily editable?<br>• What is the licensure?<br>• Who supports it and how can we get more information?<br>These and other issues are common when a user is trying to figure out what software or platform to use. Sandi Bates suggests that there should be a way to compare different tools, easily figure out how to access things and what to use.<br><br>Mediasite – can things stay there indefinitely (not risk being purged)? Nasser states that if a recording is not used, the department would be contacted before anything would be deleted. Archiving and downloading are also options. |

| | | |
|---|---|---|
| | | • MyMediasite – access is by request but faculty and staff are able to access it. Once requested, you are able to access it and create uploads.<br>Rick Van Eck reminded us of the new production room set up at the SMHS. This will be useful to anyone wishing to create recordings, videos, simulation assets, etc using professional equipment and with technical support.<br>No actions were determined. |
| Polling software platform (Salentiny/ Dunlevy) | Because the medical education program faculty do not use their own Zoom rooms, they do not have the ability to create polls. What can they use EASILY (and without bells and whistles or complex tech) instead? | Adrienne has been working with Medical faculty (includes guest lecturers); challenge is that they are not using their own rooms so collecting immediate feedback is challenging (survey, poll, etc.)<br>What is available at UND? Blackboard and Leo are options, but not easy/intuitive; also not instantaneous.<br>Clickers/TurningPoint includes cost; Qualtrics is easy but also is not intended for live synchronous use<br>Question is – anyone using an easy system to create surveys/polls? (some free accounts have limited responses; might be okay to purchase something if it was the ideal tool)<br>• Poll Everywhere (maybe max entries)<br>• Microsoft tools (MS forms?)<br>• Socrative<br>• Kahoot!<br>• Using non-verbal reactions in Zoom (the emoticons/hands)<br>TLAS article will round up different ways to poll, and some workshops too. But an easy all-around tool remains elusive. |
| Resource requests | Exam preparation tool<br>Library Resources currently subscribes to ExamMaster; has requested quotes for Amboss, BoardVitals, UWorld | Tabled 6/23 |

| | | |
|---|---|---|
| Scholarly Publishing | What support for scholarly publishing is needed by faculty / students?<br><br>Cabells Journalytics and Predatory Reports - requested subscription quotes | Tabled to 6/23 |
| Technopalooza | March 24 & 25 – first virtual tech fair<br>https://campus.und.edu/campus-services/uit/technopalooza.html<br>Is this something SMHS or CNPD faculty are likely to attend? Should we be doing something similar to highlight specific SMHS / CNPD resources? | Join this if you are able to – short sessions about tech taking place today and tomorrow.<br><br>Perhaps we should consider doing something similar to this within SMHS and CNPD. Who would attend and what resources would be highlighted/presented?<br>ACTION – Adrienne will save Technopalooza webpage as a PDF so we can discuss at a future meeting. |
| CoBRE Grant | Updates from Siobhan Wescott | InMed grant – 5 years. They will have more research and assistants. Is there a way to assess how many librarians or what support is needed? ACTION - Erika will discuss with Siobhan Wescott outside of the meeting and then include Dr. Ruit. |
| Announcements or Updates? | | Meeting adjourned at 1:03 PM |
