

Elective Description

Campus: Fargo (SE) Elective/Experience Title: Location of Elective:

Specialty Exploration Elective Campus Clinical Sites

Department: Various (MED) Course Number: MED 9201-01

Preceptor(s): Subspecialty faculty with faculty appointments **Period(s) Offered**: All **Number of students per period:** As approved by departments

Purpose: To gain introductory experience in a specialty or subspecialty field of medicine during a two-week elective.

Objectives: Following successful completion of this elective, the <u>student</u> will be able to:

- 1. Summarize the physician responsibilities and daily duties required for patient care in the specialty or subspecialty field. *(Competency 7.3)*
- 2. Perform physical exam skills specific to the specialty or subspecialty field. (Competency 3.1)
- 3. Research a patient care topic specific to the field using evidence-based resources. (*competency 1.6, 1.7, 2.7*)
- 4. Present a patient care topic specific to the field. (Competency 1.8)

Instructional Activities: During this elective, the student will be involved in/experience:

- 1. Daily patient care activities with the preceptor of the specialty or subspecialty.
- 2. Physical examination of patients presenting to the specialist or subspecialist physician.
- 3. Research of a patient care topic specific to the field using evidence-based research resources.
- 4. Presentation of the topic researched in #3 to the preceptor or healthcare team.

<u>Criteria for Grading</u>: During and following this elective, the <u>preceptor</u> will:

- 1. Utilize the standardized UNDSMHS specialty exploration elective evaluation form.
- 2. By direct observation and discussion with the student evaluate the student's ability to summarize the patient care responsibilities and duties of the specialty or subspecialty field (Objective #1).
- 3. Evaluate by direct observation the student's physical exam skills specific to the specialty or subspecialty (objective #2).
- 4. Evaluate by direct observation the student's completion of evidence-based research and presentation on a clinical topic specific to the field (Objectives #3 and 4)
