

INMED: NEUROscience

Indians Into Medicine: Native Educator University Research Opportunity
8-week Professional Development program for High School science teachers in tribal schools

- **Research experience in biomedical science lab**
- **STEM pedagogy training**
- **2 continuing education credits available**
- **Stipend for teachers (\$15,000)**

INMED: NEUROscience places teachers in a biomedical science research lab at the UND School of Medicine and Health Sciences where they will gain first-hand experience conducting science research. Teachers will also work with science educators to translate their research experience into the classroom.

This comprehensive professional development program aims to build on and improve teachers' understanding of the scientific process and support them in their science pedagogy in an effort to provide learning environments for American Indian students that foster scientific inquiry and promote the attainment of careers in healthcare.

JUNE 3 – JULY 26, 2024

Hybrid science pedagogy training and on-campus Lab Experience
