

Statistical Rules to Tape to Your Forehead

1	Annunciation	Clearly state your research questions.	
2	Exploration	Get to know your data in and out.	
3	Assumptions	Ensure that your data meets test assumptions.	
4	Building	Build one or more statistical models for your data.	
5	Testing	Test your statistical models on your data.	
6	Justifying	Justify your model results.	
7	Presentation	Present your results through text, tables, and figures.	
8	Interpretation	Clearly explain what your results are and what they mean.
